

Level 1/2 Criteria Change

Currently, level 1 and level 2 members are being leveled on whether or not they have a Home and Community Based Service (HCBS) in place. Going forward, we are going to change the way we level them. If a member has an IADL **need**, regardless of whether or not they have a HCBS in place, they should be a Level 2. Level 1 members should be completely independent with no IADL or ADL needs, but can have transportation service (only) in place.

Care Coordinators: If you realize during an ongoing assessment that a Level 1 member has an IADL need, please task the Clinical Consultant to re-level and assign the member to a GSSC.

Member Leveling:

Level 1 - No IADL/ ADL need (may have transportation service only)

Level 2 - IADL need with or without HCBS

Level 3 - AD/CMI with or without HCBS

Level 4 - ADL needs with or without HCBS
