

CaseTrakker Immunization/Screenings Enhancement

Care Managers are now able to enter an Immunization/Screening "**Disposition**" (e.g., Refused, Allergic, or Received) in the Immunization/Screening section of the Member File. For example, if a member has refused to have an Eye Exam completed, you are now able to document this using the "**Refused**" option under the "**Disposition**" drop-down under the Immunization/Screening section.

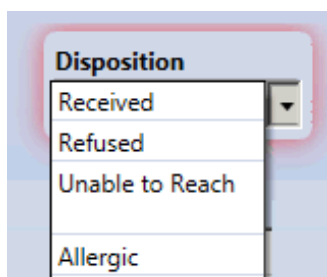

Process for documenting/updating the Immunization/Screening section:

1. Select an existing "**Immunization/Screening Type**" from the field drop-down

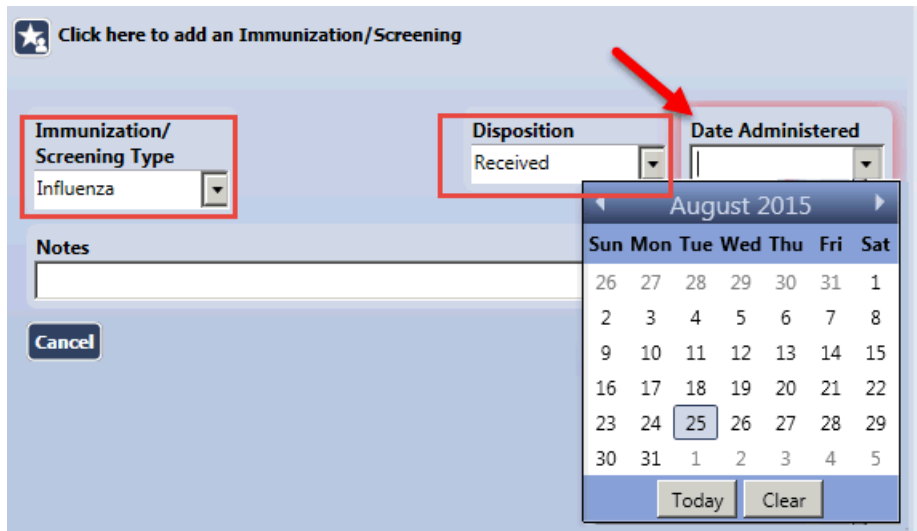

2. Select one of the following "**Disposition**" drop-down options:

3. If **"Received"** is selected, a **"Date Administered"** field appears and is editable.

Note: The "Date Administered" field will not display for any other disposition option.
