

Tuesday Tip - CaseTrakker Spell Checker

To utilize the Spell Checker feature in CaseTrakker, right-click anywhere in a **Notes** field and select **Check Spelling**.

The screenshot displays the CaseTrakker interface for an activity log. At the top, the TUFTS Health Plan logo is visible on the left, and the patient information 'Activity Log for Betty White' is on the right, including DOB (8/12/1935), Phone (916) 757-1444, and Entered By/On (Damien Wimbush - 3/8/2016 2:19:18 PM). A 'Status' dropdown is set to 'Pending', and the 'Created Date' is 3/8/2016 2:19:18 PM.

The 'Activity Information' section shows 'Activity Type' set to 'Clinical Note'. Below this is the 'Notes' field, which contains a list of assessment categories: 'Date of Assessment', 'Brief Overview:', 'Current Services:', 'Current DME:', 'Current Supplies:', 'Treating Providers:', and 'Plan/Areas of Concern/Next Steps:'. A right-click context menu is open over the 'Notes' field, with a red arrow pointing to the 'Check Spelling' option. The menu also includes 'Standard Text', 'Cut (Ctrl+X)', 'Copy (Ctrl+C)', 'Paste (Ctrl+V)', 'Undo (Ctrl+Z)', and 'Select All (Ctrl+A)'. On the right side of the interface, there is a vertical list of activity types: 'Task', 'IP Prior Auth', 'Inpatient Stay', and 'Outpatient', each with a star icon. A zoom slider at the bottom right is set to 100%.
