

Updated 09/2021

Rhode Island Large Group 4-Tier Formulary

Effective: 01/01/2022

Key Terms

Formulary

A formulary is a list of prescription medications developed by a committee of practicing physicians and practicing pharmacists who represent a variety of specialty areas and who are knowledgeable in the diagnosis and treatment of disease.

Brand-Name Drugs

Brand-name drugs are typically the first products to gain U.S. Food and Drug Administration (FDA) approval.

Generic Drugs

Generic drugs have the same active ingredients and come in the same strengths and dosage forms as the equivalent brand-name drug. Multiple manufacturers may produce the same generic drug and the product may differ from its brand name counterpart in color, size or shape, but the differences do not alter the effectiveness. Generic versions of brand-name drugs are reviewed and approved by the FDA. The FDA works closely with all pharmaceutical companies to make sure that all drugs sold in the U.S. meet appropriate standards for strength, quality, and purity.

Note: With limited exceptions, when a generic launches the brand name drug will move to not covered immediately following the generic launch.

4-Tier Pharmacy Copayment Program (4-Tier Program)

To help maintain affordability in the pharmacy benefit, we encourage the use of cost-effective drugs and preferred brand names through the four-tier program. This program gives you and your doctor the opportunity to work together to find a prescription medication that's affordable and appropriate for you.

All covered drugs are placed into one of four tiers. Your physician may have the option to write you a prescription for a Tier 1, Tier 2, Tier 3 or Tier 4 drug (as defined below); however, there may be instances when only a Tier 4 drug is appropriate, which will require a higher copayment. The program features a high cost tier mostly inclusive of specialty drugs included in and available through the Designated Specialty Pharmacy (SP) program. Drugs available through the SP program include but are not limited to medications used in the treatment of rare diseases, infertility, hepatitis C, growth hormone deficiency, multiple sclerosis, rheumatoid arthritis, and cancers treated with oral medications.

- **Tier 1:** Medications on this tier have the lowest cost sharing amount
- **Tier 2:** Medications on this tier have a higher cost sharing amount
- **Tier 3:** Medications on this tier have a higher cost sharing amount
- **Tier 4:** Medications on this tier have the highest cost sharing amount; limited to a 30 day supply

Please note that tier placement is subject to change throughout the year.

Copayment

A copayment is the fee a member pays for certain covered drugs. A member pays the copayment directly to the provider when he/she receives a covered drug, unless the provider arranges otherwise.

Coinsurance

Coinurance requires the member to pay a percentage of the total cost for certain covered drugs.

Medical Review Process

Tufts Health Plan has pharmacy programs in place to help manage the pharmacy benefit. Requests for medically necessary review for coverage of drugs included in the New-to-Market Drug Evaluation Process (NTM), Prior Authorization Program (PA), Step Therapy Prior Authorization Program (STPA), Quantity Limitations Program (QL), Non-Covered Drugs (NC) With Suggested Alternatives Program should be completed by the physician and sent to Tufts Health Plan. Drugs excluded under your pharmacy benefit will not be covered through this process. The request must include clinical information that supports why the drug is medically necessary for you. Tufts Health Plan will approve the request if it meets coverage guidelines. If Tufts Health Plan does not approve the request, you have the right to appeal. The appeal process is described in your benefit document.

Quantity Limitation (QL) Program

Because of potential safety and utilization concerns, Tufts Health Plan has placed quantity limitations on some prescription drugs. You are covered for up to the amount posted in our list of covered drugs. These quantities are based on recognized standards of care as well as from FDA-approved dosing guidelines. If your provider believes it is necessary for you to take more than the QL amount posted on the list, he or she may submit a request for coverage under the Medical Review Process.

New-To-Market Drug Evaluation Process (NTM)

In an effort to make sure the new-to-market prescription drugs we cover are safe, effective and affordable, we delay coverage of many new drug products until the Plan's Pharmacy and Therapeutics Committee and physician specialists have reviewed them. This review process is usually completed within six months after a drug becomes available.

The review process enables us to learn a great deal about these new drugs, including how a physician can safely prescribe these new drugs and how physicians can choose the most appropriate patients for the new therapy. During the review process, if your physician believes you have a medical need for the New-To-Market drug, your doctor can submit a request for coverage to Tufts Health Plan under the Medical Review Process.

Note: Drugs approved through the Medical Review Process may be subject to the highest copayment.

Non-Covered Drugs (NC)

There are thousands of drugs listed on the Tufts Health Plan covered drug list. In fact, most drugs are covered. There is, however, a list of drugs that Tufts Health Plan currently does not cover.

In many cases, these drugs are not covered by Tufts Health Plan because there are safe, comparably effective, and cost effective alternatives available. Our goal is to keep pharmacy benefits as affordable as possible.

If your doctor feels that one of the non-covered drugs is needed, your doctor can submit a request for coverage to Tufts Health Plan under the Medical Review Process.

Note: Drugs approved through the Medical Review Process may be subject to the highest copayment.

Prior Authorization (PA) Program

In order to ensure safety and affordability for everyone, some medications require prior authorization. This helps us work with your doctor to ensure that medications are prescribed appropriately.

If your doctor feels it is medically necessary for you to take one of the drugs listed below, he/she can submit a request for coverage to Tufts Health Plan under the Medical Review Process.

CM	Cancer Mandate
NTM	New-to-Market
SI	Specialty Infusion
WH	Women's Health

MM	Mandatory Mail
PA	Prior Authorization
SP	Designated Specialty Pharmacy
ACA	Preventive Service

NC	Non Covered Drugs
QL	Quantity Limitation Program
STPA	Step Therapy Prior Authorization

Step Therapy Prior Authorization (STPA)

Step Therapy is an automated form of Prior Authorization. It encourages the use of therapies that should be tried first, before other treatments are covered, based on clinical practice guidelines and cost-effectiveness. Some types of Step Therapy include requiring the use of generics before brand name drugs, preferred before non-preferred brand name drugs, and first-line before second-line therapies.

Medications included on step 1- the lowest step-are usually covered without authorization. We have noted the few exceptions, which may require your physician to submit a request to Tufts Health Plan for coverage. Medications on Step 2 or higher are automatically authorized at the point-of-sale if you have taken the required prerequisite drugs. However, if your physician prescribes a medication on a higher step, and you have not yet taken the required medication(s) on a lower step, or if you are a new Tufts Health Plan member and do not have any prescription drug claims history, the prescription will deny at the point-of-sale with a message indicating that a Prior Authorization (PA) is required. Physicians may submit requests for coverage to Tufts Health Plan for members who do not meet the Step Therapy criteria at the point of sale under the Medical Review process.

Designated Specialty Pharmacy Program (SP)

Tufts Health Plan's goal is to offer you the most clinically appropriate and cost-effective services.

As a result, we have designated special pharmacies to supply up to a 30-day supply of a select number of medications used in the treatment of complex diseases. These pharmacies are specialized in providing these medications and are staffed with nurses, coordinators and pharmacists to provide support services for members.

Other special designated pharmacies and medications may be identified and added to this program from time to time.

Benefits vary; some members may not participate in this program. Please see your benefit document for complete information.

Physicians may obtain a select number of specialty medications through a designated SP for administration in the office as an alternative to direct purchase. These medications are covered under the medical benefit, and will be shipped directly to and administered in the office by the member's provider. The designated pharmacy will bill Tufts Health Plan directly for the medication.

For the most current listing of special designated pharmacies or to find out if your plan includes this program, please call us at the number listed on the back of your member identification card.

Designated Specialty Infusion Program for Drugs Covered Under the Medical Benefit (SI)

Tufts Health Plan has designated home infusion providers for a select number of specialized pharmacy products and drug administration services.

The designated specialty infusion provider offers clinical management of drug therapies, nursing support, and care coordination to members with acute and chronic conditions. Place of service may be in the home or alternate infusion site based on availability of infusion centers and determination of the most clinically appropriate site for treatment. These medications are covered under the medical benefit (not the pharmacy benefit) and generally require support services, medication dose management, and special handling in addition to the drug administration services. Medications include, but are not limited to, medications used in the treatment of hemophilia, pulmonary arterial hypertension, and immune deficiency. Other specialty infusion providers and medications may be identified and added to this program from time to time.

NTM	New-to-Market	PA	Prior Authorization	QL	Quantity Limitation Program
SI	Specialty Infusion	SP	Designated Specialty Pharmacy	STPA	Step Therapy Prior Authorization
WH	Women's Health	ACA	Preventive Service		

Over-The-Counter Drugs (OTC)

When a medication with the same active ingredient or a modified version of an active ingredient that is therapeutically equivalent, becomes available over-the-counter, Tufts Health Plan may exclude coverage of the specific medication or all of the prescription drugs in the class. For more information, please call our Member Services Department at the number listed on the back of your member identification card.

Cancer Mandate (CM)

Oral Cancer medications may have a cost share of up to \$0 for up to a 30 day supply under the Rhode Island oral cancer therapy mandate. Please check your benefit document.

Low Cost Generic (LCG)

Certain medications may be included in the Low Cost Generic program and be subject to a \$5 copay for a 30-day supply rather than the tier 1 copay. Please check your benefit document.

Women's Health (WH)

Certain medications may be covered without copayment under Women's Health Preventive Services Initiative. Please contact your plan sponsor / employer about applicability and effective date for your group.

Affordable Care Act (ACA)

Under the Patient Protection and Affordable Care Act (PPACA), commonly called the Affordable Care Act (ACA) or health care reform, these preventive medications may be covered at no cost (copay, coinsurance, or deductible) for Tufts Health Plan members, depending on their plan benefits. Please check the specific terms of your plan benefit document.

Note: A prescription is required for all listed medications, including over-the-counter (OTC) medications

Tufts Health Plan complies with applicable Federal civil rights laws and does not discriminate on the basis of race, color, national origin, age, disability, or sex. Tufts Health Plan does not exclude people or treat them differently because of race, color, national origin, age, disability, or sex.

Tufts Health Plan:

- Provides free aids and services to people with disabilities to communicate effectively with us, such as:
 - Written information in other formats (large print, audio, accessible electronic formats, other formats)
- Provides free language services to people whose primary language is not English, such as:
 - Qualified interpreters
 - Information written in other languages

If you need these services, contact Tufts Health Plan at 800.462-0224.

If you believe that Tufts Health Plan has failed to provide these services or discriminated in another way on the basis of race, color, national origin, age, disability, or sex, you can file a grievance with:

Tufts Health Plan, Attention:

Civil Rights Coordinator Legal Dept.

705 Mount Auburn St. Watertown, MA 02472

Phone: 888.880.8699 ext. 48000, [TTY number— 800.439.2370 or 711]

Fax: 617.972.9048

Email: OCRCordinator@tufts-health.com.

You can file a grievance in person or by mail, fax, or email. If you need help filing a grievance, the Tufts Health Plan Civil Rights Coordinator is available to help you.

You can also file a civil rights complaint with the U.S. Department of Health and Human Services, Office for Civil Rights, electronically through the Office for Civil Rights Complaint Portal, available at <https://ocrportal.hhs.gov/ocr/portal/lobby.jsf>, or by mail or phone at:

QUANTITY LIMITATION (QL) PROGRAM

Rhode Island Commercial Tier 3 Formulary (10/22/2021)

Step: 1 [Results](#)

If you have questions about this program, please contact us at the number listed on the back of your member identification card.

[Print](#)

Because of potential safety and utilization concerns, Tufts Health Plan has placed quantity limitations on a small number of prescription drugs

This means that your physician can only prescribe a certain quantity of a drug within a given time period. These quantities are based on recognized standards of care, such as U.S. Food and Drug Administration recommendations for use

If your doctor believes you need a quantity greater than the program limitation, your doctor can submit a request for coverage under the Medical Review Process. For more information regarding this process; see the Key Terms section (click button at left)

If you have questions about this program or coverage, please call us at the numbers listed in the Overview section

Brand Name	Additional Information
Abilify Mycite PA QL	1 tablet/day
acetaminophen/caffeine/dihydrocodeine tablets QL	325/30/16mg: 10 tablets/day
AcipHex PA QL	90 tablets/90 days
