Tufts Health RITogether
Repetitive Transcranial Magnetic Stimulation Request Form
Please fax form to: 857.304.6404

Today's date: _____/_____/_____

Member care information	
☐ In Network ☐ Out of Network	
Member Name: _____	DOB: _____/_____/_____
Gender: _____	Member ID #: _____
Date of request: _____/_____/_____	Time of request: _____
Treating clinician/facility: _____	
If the treating clinician is not making this request, has the treating clinician been notified? ☐ Yes ☐ No	
Phone #: _____	NPI/TIN#: _____
Servicing Clinician/Facility: _____	
Phone #: _____	NPI/TIN#: _____

Initial treatment information			
1. Has a confirmed diagnosis of severe major depressive disorder (MDD) single or recurrent episode			
☐ F32.2	Major Depressive Disorder, Single Episode, Severe (without psychotic features)		
☐ F32.3	Major Depressive Disorder, Recurrent Episode, Severe (without psychotic features)		
Pre-treatment rating scale: GDS _____, PHQ-9 _____, BDI _____, HAM-D _____, MADRS _____, or IDS-SR _____			

And

2. One or more of the following:
   - ☐ Resistance to treatment with psychopharmacologic agencies as evidenced by a lack of clinically significant response to four adequate trials of at least 6 weeks duration of psychopharmacologic agents in the current depressive episode from at least two different classes as documented by standardized rating scales that reliably measure depressive symptoms (GDS, PHQ-9, BDI, HAM-D, MADRS, QIDS, or IDS-SR); OR
   - ☐ Inability to tolerate psychopharmacologic agents as evidenced by four trials of Psychopharmacologic agents from at least two different agent classes (at least one of which is in the antidepressant class), with distinct side effects; or
   - ☐ History of response to rTMS in a previous depressive episode; or
   - ☐ Currently receiving electroconvulsive therapy (ECT)
   - ☐ Currently considering ECT; rTMS may be considered as a less invasive treatment option

***Note for reference:** Remission is typically defined by the following measurement scores: Beck Depression Scale (BDI) score <9, Hamilton Depression Rating Scale (HAM-D) score of <8 on the HAM-D-17 and <11 on the HAM-D-24, Montgomery-Asberg Depression Rating Scale (MADRS) score of <10, Patient Health Questionnaire (PHQ-9) score of <5.*

And

3. ☐ A trial of evidence-based psychotherapy known to be effective in the treatment of MDD of an adequate frequency and duration without significant improvement in depressive symptoms as documented by standardized rating scales that reliably measure depressive symptoms (GDS, PHQ-9, BDI, HAM-D, MADRS, QIDS, IDS-SR).

And

4. ☐ An order written by a psychiatrist (MD or DO) who has examined the patient and reviewed the record. The physician will have experience in administering TMS therapy. The treatment shall be given under direct supervision of this physician.

Potential Contraindications

(Please select all applicable contraindications the patient has from the list below)

- ☐ Seizure disorder or any history of seizures (expect those induced by ECT or isolated febrile seizures in infancy without subsequent treatment or recurrence)
- ☐ Presence of acute or chronic psychotic symptoms or disorders in the current depressive mode
- ☐ Neurological conditions that include epilepsy, cerebrovascular disease, dementia, increased intracranial pressure, history of repetitive or severe head trauma, or primary or secondary tumors in the central nervous system
- ☐ Presence of an implanted magnetic-sensitive medical device located less than or equal to 30 cm from the TMS TMS magnetic coil or other implanted metal items including but not limited to a cochlear implant, implanted cardiac defibrillator (ICD), pacemaker, vagus nerve stimulation (VNS), or metal aneurysm clops or coils, staples, or stents.
  Note: Dental amalgam fillings are not affected by magnetic field and are acceptable to use with TMS.
- ☐ Prior failed trial of an adequate course of treatment with ECT or vagus nerve stimulation (VNS) for Major Depressive Disorder

The patient is currently: ☐ Pregnant ☐ Nursing

☐ The patient has a current suicide plan or recent suicide attempt

☐ Current active history of (check those that apply):
- ☐ Eating disorder
- ☐ Psychotic disorder, including schizoaffective disorder
- ☐ Bipolar disorder

History of (check those that apply):
- ☐ Substance use
- ☐ Obsessive compulsive disorder
- ☐ Post-traumatic stress disorder

Retreatment

1. Patient met the guidelines for initial treatment AND meets guidelines currently.

AND

2. Subsequently developed relapse of depressive symptoms

AND

3. Responded to prior treatments as evidences by a greater than 50% improvement in standard rating scale measurements for depressive symptoms (e.g., GDS, PHQ-9, BDI, HAM-D, MADRS, QIDS, or IDS-SR scores.)

Post-treatment rating scale: GDS _____, PHQ-9 _____, BDI _____, HAM-D _____, MADRS _____, or IDS-SR _____

Dates of initial treatment, if known: _____/_____/_____, _____/_____/_____

Treatment Type(s) Requested

FDA-approved TMS device to be used for the following treatment:

☐ 90867	Therapeutic Repetitive Transcranial Magnetic Stimulation (TMS) Treatment-initial including cortical mapping, motor threshold determination, and delivery and management		
☐ 90868	Therapeutic Repetitive Transcranial Magnetic Stimulation (TMS) treatment-subsequent delivery and management, per session		
☐ 90869	Therapeutic Repetitive Transcranial Magnetic Stimulation (TMS) treatment-subsequent motor threshold redetermination with delivery and management
