**Note:** While you may not be the provider responsible for obtaining prior authorization, as a condition of payment you will need to make sure that prior authorization has been obtained.

**Note:** This guideline is used to determine coverage of private duty nursing in the home for Members whose plan documents include this benefit.

## OVERVIEW

**Definition of homebound used in the document:**
- To be considered homebound, a Member does not have to be bedridden. However, the condition should be such that there exists a normal inability to leave the home, and consequently, leaving the home would require a considerable and taxing effort. If the Member can leave the home, the Member may be considered homebound if the absences from the home are infrequent, for periods of relatively short duration, or to receive medical treatment. (Centers for Medicare and Medicaid Services, 2001).

## COVERAGE GUIDELINES

Tufts Health Plan may authorize coverage of private duty nursing for Members in the home, when all of the following criteria are met:
- The services are medically necessary.
- The services are ordered by a physician.
- The services are received in a Member's home for a Member who is homebound (see definition of homebound that is to be used for this benefit under “overview” above).
- The services are performed by a certified home health agency by a licensed nurse (RN or LPN).
- The Member requires continuous skilled nursing observation and intervention.

## LIMITATIONS

Tufts Health Plan does not cover the following services as private duty nursing:
- When provided by a private duty nurse:
  - The primary duties are limited to bathing, feeding, exercising, homemaking, giving oral medications or acting as a companion or sitter
  - The duties are performed by a member of your household or when the cost of any care is being provided by the Member’s relatives (by blood, marriage or adoption)
  - The care is provided outside of the home (e.g., a school, nursing facility or assisted living facility)
  - The services duplicate or overlap services (e.g., when a person is receiving hospice care services or is receiving skilled nursing home care visits during the same hours)
- The services are for observation only
- Services of a nurse’s aide
- Care for a Member without an available caregiver in the home
- Maintenance care when the Member’s condition has stabilized (including routine ostomy care or tube feeding administration) or if the anticipated need is indefinite
- Respite care (for example, care during a caregiver’s vacation) or to allow a caregiver to work or attend school

- September 2015: Branding and template change to distinguish Tufts Health Plan products in "Applies to" section. Added Tufts Health Freedom Plan products, effective January 1, 2016.
- September 14, 2016: Reviewed by IMPAC, renewed without changes
- April 2017: Added RITogether Plan product to template. For MNGs applicable to RITogether, effective date is August 1, 2017
- October 10, 2018: Reviewed by IMPAC, renewed without changes

**BACKGROUND, PRODUCT AND DISCLAIMER INFORMATION**

Medical Necessity Guidelines are developed to determine coverage for benefits, and are published to provide a better understanding of the basis upon which coverage decisions are made. We make coverage decisions using these guidelines, along with the Member's benefit document, and in coordination with the Member’s physician(s) on a case-by-case basis considering the individual Member's health care needs.

Medical Necessity Guidelines are developed for selected therapeutic or diagnostic services found to be safe and proven effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the our service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. We revise and update Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

Medical Necessity Guidelines apply to the fully insured Commercial and Medicaid products when Tufts Health Plan conducts utilization review unless otherwise noted in this guideline or in the Member’s benefit document, and may apply to Tufts Health Unify to the same extent as Tufts Health Together. This guideline does not apply to Tufts Medicare Preferred HMO, Tufts Health Plan Senior Care Options or to certain delegated service arrangements. For self-insured plans, coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a Medical Necessity Guideline and a self-insured Member’s benefit document, the provisions of the benefit document will govern. Applicable state or federal mandates or other requirements will take precedence. For CareLinkSM Members, Cigna conducts utilization review so Cigna’s medical necessity guidelines, rather than these guidelines, will apply.

Treating providers are solely responsible for the medical advice and treatment of Members. The use of these guidelines is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to eligibility and benefits on the date of service, coordination of benefits, referral/authorization, utilization management guidelines when applicable, and adherence to plan policies, plan procedures, and claims editing logic.
