OVERVIEW

Tufts Health Plan defines Therapeutic Lenses, for the purpose of these Medical Necessity Guidelines, as lenses that provide visual rehabilitation for diseased or altered eyes (Kolbaum, 2003). These lenses can be either eyeglass or contact lenses and require prior authorization as described by the Coverage Guidelines below.

Contact lenses that are used to protect or reduce pain in injured eyes, including but not limited to bandage contact lenses, are covered when medically necessary without prior authorization.

CLINICAL COVERAGE CRITERIA

Tufts Health Plan may provide coverage, without prior authorization, for the cost of either one set of contact lenses or one set of eyeglasses, when ordered by a physician or optometrist, and when the Member meets one of the following criteria:

- The Member has aphakia or has had a covered eye surgery, for removal of the natural lens of the eye, without intraocular lens placement.
NOTE: Coverage is provided for one pair of eyeglasses (standard prescription lenses and standard (non-deluxe) frames) **or** one set of contact lenses **per covered surgery**.
- The Member has one of the following conditions **and** there has been a prescription change:
 - Keratoconus
 - Anisometropia (more than 3.0 diopters)
 - High myopia (more than 14.0 diopters)
 - Persistent epithelial defects
 - Post corneal transplant perforations
 - Aniridia**Note:** Coverage is provided for one pair of eyeglasses (standard prescription lenses and standard (non-deluxe) frames) **or** one set of contact lenses **per benefit year**.

LIMITATIONS

- Tufts Health Plan will not cover the cost of supplies used to clean or otherwise maintain lenses.
- Tufts Health Plan will not cover the cost of sunglasses.
- Tufts Health Plan does not cover low-vision aids (including lenses) for low vision except for diabetics who are legally blind.
- "Add On" to lenses, including but not limited to tints and progressive lenses are not covered.

Background, Product and Disclaimer Information

Medical Necessity Guidelines are developed to determine coverage for benefits, and are published to provide a better understanding of the basis upon which coverage decisions are made. We make coverage decisions using these guidelines, along with the Member's benefit document, and in coordination with the Member's physician(s) on a case-by-case basis considering the individual Member's health care needs.

Medical Necessity Guidelines are developed for selected therapeutic or diagnostic services found to be safe and proven effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in our service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. We revise and update Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

For self-insured plans, coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a Medical Necessity Guideline and a self-insured Member's benefit document, the provisions of the benefit document will govern.

Treating providers are solely responsible for the medical advice and treatment of Members. The use of this guideline is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to eligibility and benefits on the date of service, coordination of benefits, referral/authorization, utilization management guidelines when applicable, and adherence to plan policies, plan procedures, and claims editing logic.
