OVERVIEW

FOOD AND DRUG ADMINISTRATION-APPROVED INDICATIONS

Aubagio (teriflunomide) is a pyrimidine synthesis inhibitor indicated for the treatment of patients with relapsing forms of multiple sclerosis (MS).

Gilenya (fingolimod) is a sphingosine 1-phosphate receptor modulator indicated for the treatment of patients with relapsing forms of MS in patients 10 years of age and older.

Tecfidera (dimethyl fumarate), the methyl ester of fumaric acid, is indicated for the treatment of patients with relapsing forms of MS.

MS is a chronic disease of the central nervous system characterized by inflammation, demyelination, and axonal degeneration. Most people are diagnosed between the ages of 20 and 50, although MS can occur in young children and significantly older adults.

It is believed that MS consists of both inflammatory and neurodegenerative components. Inflammation may be related to acute relapses, and it is believed that these acute attacks are associated with axon damage which leads to permanent neurologic dysfunction. The neurodegenerative component may contribute to the progressive disability that occurs over time.

The symptoms and severity of MS vary, and the course of the disease in an individual patient is often unpredictable. Common symptoms include sensory disturbances in the limbs leading to gait and balance problems, optic nerve dysfunction and vision loss, dysphagia, bladder or bowel dysfunction, sexual dysfunction, fatigue, emotional lability, and cognitive impairment.

Four categories of MS are recognized. Approximately 85% of patients are initially classified as having relapsing-remitting MS (RRMS) which is characterized by episodic relapses with partial or complete remissions. The majority of patients with RRMS will go on to develop secondary progressive MS (SPMS) which is characterized by an initial period of relapses and remissions, followed by a sudden progressive decrease in CNS function without periods of remission. Primary progressive MS (PPMS) is characterized by a steady decrease in CNS function from the onset without remissions or clear attacks. In contrast, patients with progressive-relapsing MS (PRMS) experience a steady decrease in CNS function from the onset and have clearly identifiable attacks. PPMS is the initial diagnosis in approximately 10% of patients while 5% of patients have PRMS.
COVERAGE GUIDELINES
The plan may authorize coverage of Aubagio (teriflunomide), Gilenya (fingolimod), or Tecfidera (dimethyl fumarate) for Members when all the following criteria are met:

Aubagio and Tecfidera
1. Documented diagnosis of a relapsing form of multiple sclerosis
   AND
2. Documentation of one of the following:
   a. The Member has tried and failed, or the provider has documented clinical inappropriateness of treatment with at least one of the following medications: glatiramer, Rebif, Avonex, Betaseron, Extavia, or Tysabri
   b. The Member is new to the plan and has been stabilized on the requested medication (Aubagio or Tecfidera) prior to enrollment

Gilenya
1. Documented diagnosis of a relapsing form of multiple sclerosis
   AND
2. Documentation of one of the following:
   a. For Members 18 years or older, previous trial and failure of or clinical inappropriateness of treatment with at least one of the following: glatiramer, Rebif, Avonex, Betaseron, Extavia, or Tysabri
   b. The Member is new to the plan and has been stabilized on Gilenya (fingolimod) prior to enrollment
   c. The Member is 10 to 17 years of age

LIMITATIONS
1. The following quantity limitations apply:
   a. Aubagio (teriflunomide): 30 tablets per 30 days
   b. Gilenya (fingolimod): 30 capsules per 30 days
   c. Tecfidera (dimethyl fumarate): 60 capsules per 30 days

CODES
None

7. Gilenya (fingolimod) [prescribing information]. East Hanover, NJ: Novartis Pharmaceuticals Corporation; 2018 May.

APPROVAL HISTORY
January 20, 2011: Reviewed by Pharmacy & Therapeutics Committee.

Subsequent endorsement date(s) and changes made:
- June 4, 2014: No changes.
- June 9, 2015: No changes.
- January 1, 2016: Administrative change to rebranded template.
- June 14, 2016: No changes.
- May 9, 2017: Administrative update, Adding Tufts Health RITogether to the template
- June 13, 2017: No changes.
- June 12, 2018: Effective August 7, 2018 this Medical Necessity Guideline applies to Tufts Health RITogether. Changed name of Medical Necessity Guideline from “Gilenya (fingolimod)” to “Aubagio (teriflunomide), Gilenya (fingolimod), and Tecfidera (dimethyl fumarate)” and added existing coverage criteria for Aubagio and Tecfidera into the Medical Necessity Guideline. No changes were made to Aubagio and Tecfidera. Coverage criteria for Gilenya was updated to address the May 2018 expanded indication for the treatment of patients at least 10 years of age.

BACKGROUND, PRODUCT AND DISCLAIMER INFORMATION
Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. They are used in conjunction with a Member’s benefit document and in coordination with the Member’s physician(s). The plan makes coverage decisions on a case-by-case basis considering the individual Member’s health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

This Pharmacy Medical Necessity Guideline does not apply to Uniformed Services Family Health Plan Members or to certain delegated service arrangements. Unless otherwise noted in the Member’s benefit document or applicable Pharmacy Medical Necessity Guideline, Pharmacy Medical Necessity Guidelines do not apply to CareLinkSM Members. For self-insured plans, drug coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a coverage guideline and a self-insured Member’s benefit document, the provisions of the benefit document will govern. Applicable state or federal mandates will take precedence.

For Tufts Health Plan Medicare Preferred, please refer to Tufts Health Plan Medicare Preferred Prior Authorization Criteria.

Treating providers are solely responsible for the medical advice and treatment of Members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to Member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
