Note: For Tufts Health Plan Medicare Preferred Members, please refer to the Tufts Health Plan Medicare Preferred Prior Authorization Criteria. Background, applicable product and disclaimer information can be found on the last page.

OVERVIEW
Neurogenic orthostatic hypotension (nOH) results from failure of the autonomic nervous system to regulate blood pressure in response to postural change due to an inadequate release of norepinephrine. Northera (droxidopa), a synthetic amino acid analog that is directly metabolized to norepinephrine, is Food and Drug Administration (FDA)-approved for treatment of nOH. While the exact mechanism of action of Northera (droxidopa) in the treatment of nOH is unknown, it is believed to exert its pharmacological effects through norepinephrine. Norepinephrine increases blood pressure by inducing peripheral arterial and venous vasoconstriction. In one small, short-term clinical trial, Northera (droxidopa) was shown to improve dizziness symptom scores and increase standing systolic blood pressure within three minutes after standing through one week of treatment.

FDA APPROVED INDICATIONS
Northera (droxidopa) is FDA-approved for the treatment of orthostatic dizziness, lightheadedness, or the "feeling that you are about to black out" in adult patients with symptomatic neurogenic orthostatic hypotension caused by primary autonomic failure (Parkinson's disease, multiple system atrophy, and pure autonomic failure), dopamine beta-hydroxylase deficiency, and non-diabetic autonomic neuropathy.

Effectiveness of Northera (droxidopa) beyond two weeks of treatment has not been demonstrated. The continued effectiveness of Northera (droxidopa) should be assessed periodically.

COVERAGE GUIDELINES
The plan may authorize coverage of Northera (droxidopa) for Members, when the following criteria are met:

1. Documented diagnosis of symptomatic neurogenic orthostatic hypotension

AND

2. Documentation the Member has tried and failed both midodrine and fludrocortisone due to inadequate response or adverse effects

LIMITATIONS
None

CODES
None

APPROVAL HISTORY
January 13, 2015: Reviewed by Pharmacy & Therapeutics Committee.

Subsequent endorsement date(s) and changes made:
- January 1, 2016: Administrative change to rebranded template applicable to Tufts Health Direct.
- January 12, 2016: No changes
- January 10, 2017: No changes. Effective 1/10/17, Medical Necessity Guideline applies to Tufts Health Together.

BACKGROUND, PRODUCT AND DISCLAIMER INFORMATION
Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. They are used in conjunction with a Member’s benefit document and in coordination with the Member’s physician(s). The plan makes coverage decisions on a case-by-case basis considering the individual Member’s health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

This Pharmacy Medical Necessity Guideline does not apply to Uniformed Services Family Health Plan Members or to certain delegated service arrangements. Unless otherwise noted in the Member's
benefit document or applicable Pharmacy Medical Necessity Guideline, Pharmacy Medical Necessity Guidelines do not apply to CareLink™ Members. For self-insured plans, drug coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a coverage guideline and a self-insured Member’s benefit document, the provisions of the benefit document will govern. Applicable state or federal mandates will take precedence.

For Tufts Health Medicare Preferred, please refer to Tufts Health Medicare Preferred Prior Authorization Criteria.

Treating providers are solely responsible for the medical advice and treatment of Members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to Member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
