OVERVIEW

FDA-APPROVED INDICATIONS

The sodium-glucose co-transporter 2 inhibitors (SGLT2s) are indicated as an adjunct to diet and exercise to improve glycemic control in adults with type 2 diabetes mellitus.

Tufts Health Together Preferred Drug List status:

<table>
<thead>
<tr>
<th>Generic Name</th>
<th>Brand Name</th>
<th>PDL Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ertugliflozin</td>
<td>Steglatro</td>
<td>ST; Tier 2</td>
</tr>
<tr>
<td>Ertugliflozin-Metformin</td>
<td>Segluromet</td>
<td>ST; Tier 2</td>
</tr>
</tbody>
</table>

Tufts Health Together members may fill a prescription for Steglatro or Seglurometas a step therapy medication at the point-of-sale if the Member has previous prescription claims for a 30-day supply of metformin.

SGLT2 Inhibitors not included in the PDL or within the SGLT2 medical necessity guideline are considered non-covered.

COVERAGE GUIDELINES

The plan may authorize coverage of a sodium-glucose co-transporter 2 inhibitor for Members when the criteria are met and limitations do not apply:

**Steglatro or Segluromet**
1. The member is stable on the requested medication
2. The member tried and failed therapy, or the provider indicates clinical inappropriateness of therapy with metformin

LIMITATIONS

None

CODES

None

**APPROVAL HISTORY**
December 12, 2013: Reviewed by Pharmacy & Therapeutics Committee.

Subsequent endorsement date(s) and changes made:
- June 12, 2014: No changes.
- March 10, 2015: Xigduo XR added; approval duration limited to one year.
- September 16, 2015: Approval duration approved for life of plan.
- January 1, 2016: Administrative change to rebranded template.
BACKGROUND, PRODUCT AND DISCLAIMER INFORMATION

Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. They are used in conjunction with a member’s benefit document and in coordination with the member’s physician(s). The plan makes coverage decisions on a case-by-case basis considering the individual member’s health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

This Pharmacy Medical Necessity Guideline does not apply to Uniformed Services Family Health Plan members or to certain delegated service arrangements. Unless otherwise noted in the member's benefit document or applicable Pharmacy Medical Necessity Guideline, Pharmacy Medical Necessity Guidelines do not apply to CareLinkSM members. For self-insured plans, drug coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a coverage guideline and a self-insured member’s benefit document, the provisions of the benefit document will govern. Applicable state or federal mandates will take precedence.

For Tufts Health Plan Medicare Preferred, please refer to Tufts Health Plan Medicare Preferred Prior Authorization Criteria.

Treating providers are solely responsible for the medical advice and treatment of members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
