Note: For Tufts Health Plan Medicare Preferred Members, please refer to the Tufts Health Plan Medicare Preferred Prior Authorization Criteria. Background, applicable product and disclaimer information can be found on the last page.

OVERVIEW
The Food and Drug Administration (FDA) has approved three sublingual immunotherapy (SLIT) medications, Grastek, Oralair, and Ragwitek, for the treatment of pollen-induced allergic rhinitis. These SLIT medications contain small amounts of an allergen extract. Exposure to the allergen allows the immune system to become less sensitive to the allergen. The natural response to the allergen is decreased, resulting in reduction in allergy symptoms.

FDA-APPROVED INDICATIONS
Grastek, Oralair, and Ragwitek are indicated as immunotherapy for the treatment of pollen-induced allergic rhinitis (hay fever), with or without conjunctivitis (eye inflammation) confirmed by positive skin test or in vitro testing for pollen-specific IgE antibodies for the following:

- Oralair: sweet vernal, orchard, perennial rye, Timothy, and Kentucky blue grass mixed pollens
- Grastek: Timothy grass pollen
- Ragwitek: short ragweed pollen

Oralair and Grastek are approved for children and adults. Oralair is approved for 10 to 65 years of age and Grastek for 5 to 65 years of age. Ragwitek is approved only in adults 18 through 65 years of age.

COVERAGE GUIDELINES
The plan may authorize coverage of a sublingual immunotherapy medications medication for Members when all of the following criteria are met:

Oralair
1. Documentation the Member is between the ages 10 and 65 years old
   AND
2. Confirmation of a positive skin test or in vitro testing for pollen-specific IgE antibodies for any of the following allergens: sweet vernal, orchard, perennial rye, Timothy, or Kentucky grass within the past 2 years
   AND
3. Documentation the medication is prescribed by, or is based on the recommendations and consult of, an allergist or immunologist
   AND
4. Documentation the Member has tried and failed or had an insufficient response or intolerance to at least two of the following: oral antihistamines, nasal antihistamines, or nasal corticosteroids

**Grastek**
1. Documentation the Member is between the ages 5 and 65 years old
   AND
2. Confirmation of a positive skin test or in vitro testing for pollen-specific IgE antibodies for the following allergen: Timothy grass pollen within the past 2 years
   AND
3. Documentation the medication is prescribed by, or is based on the recommendations and consult of, an allergist or immunologist
   AND
4. Documentation the Member has tried and failed or had an insufficient response or intolerance to at least two of the following: oral antihistamines, nasal antihistamines, or nasal corticosteroids

**Ragwitek**
1. Documentation the Member is between the ages 18 and 65 years old
   AND
2. Confirmation of a positive skin test or in vitro testing for pollen-specific IgE antibodies for the following allergen: short ragweed pollen within the past 2 years
   AND
3. Documentation the medication is prescribed by, or is based on the recommendations and consult of, an allergist or immunologist
   AND
4. Documentation the Member has tried and failed or had an insufficient response or intolerance to at least two of the following: oral antihistamines, nasal antihistamines, or nasal corticosteroids

**LIMITATIONS**
1. The length of approval will be for 2 years subsequent approval will require a new authorization.
2. The following quantity limitations apply:

APPROVAL HISTORY

July 8, 2015: Reviewed by Pharmacy & Therapeutics Committee.

Subsequent endorsement date(s) and changes made:
- July 14, 2015: No changes
- January 1, 2016: Administrative change to rebranded template applicable to Tufts Health Direct.
- July 12, 2016: No changes. Effective July 12, 2016 Medical Necessity Guideline applies to Tufts Health Together.
- July 11, 2017: No changes.

BACKGROUND, PRODUCT AND DISCLAIMER INFORMATION

Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. They are used in conjunction with a Member’s benefit document and in coordination with the Member’s physician(s). The plan makes coverage decisions on a case-by-case basis considering the individual Member’s health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

This Pharmacy Medical Necessity Guideline does not apply to Uniformed Services Family Health Plan Members or to certain delegated service arrangements. Unless otherwise noted in the Member’s benefit document or applicable Pharmacy Medical Necessity Guideline, Pharmacy Medical Necessity Guidelines do not apply to CareLinkSM Members. For self-insured plans, drug coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a coverage guideline and a self-insured Member’s benefit document, the provisions of the benefit document will govern. Applicable state or federal mandates will take precedence.

For Tufts Health Plan Medicare Preferred, please refer to Tufts Health Plan Medicare Preferred Prior Authorization Criteria.
Treating providers are solely responsible for the medical advice and treatment of Members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to Member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
