OVERVIEW

FOOD AND DRUG ADMINISTRATION-APPROVED INDICATIONS

Increlex (mecasermin) is indicated for the long-term treatment of growth failure in children with severe primary IGF-1 deficiency (Primary IGF1D) or with growth hormone (GH) gene deletion who have developed neutralizing antibodies to GH. Severe Primary IGF1D is defined by height standard deviation score ≤ -3.0 , basal IGF-1 standard deviation score ≤ -3.0 , and normal or elevated GH.

COVERAGE GUIDELINES

The plan may authorize coverage of Increlex (mecasermin) for Members, when all of the following criteria are met:

1. Documented diagnosis of **one (1)** of the following:
 - a. Requested use is for the treatment of growth failure in children with growth hormone gene deletion who have developed neutralizing antibodies to growth hormone
 - b. Both of the following:
 - i. Requested use is for the treatment of growth failure in children with severe primary insulin-like growth factor-1 deficiency
 - ii. All of the following:
 1. Height standard deviation score less than or equal to -3.0
 2. Basal IGF-1 standard deviation score less than or equal -3.0
 3. Normal or elevated growth hormone level
- AND**
2. The patient is 2 to 17 years of age
- AND**
3. Prescribed by or in consultation with a pediatric endocrinologist
- AND**
4. Documentation the patient has open epiphysis

LIMITATIONS

- Coverage of Increlex will be authorized up to the Member's 18th birthday.

CODES

Medical billing codes may not be used for these medications. These medications must be obtained via the Member's pharmacy benefit.

- July 11, 2023: Updated age requirements to through 17 years of age to align with authorization duration rules. Added provider requirements (effective October 1, 2023).

BACKGROUND, PRODUCT AND DISCLAIMER INFORMATION

Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. The plan makes coverage decisions on a case-by-case basis considering the individual member's health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined

population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

For self-insured plans, coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a Pharmacy Medical Necessity Guideline and a self-insured Member's benefit document, the provisions of the benefit document will govern.

Treating providers are solely responsible for the medical advice and treatment of members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
