These pharmacy medical necessity guidelines apply to the following: <input checked="" type="checkbox"/> Tufts Health RITogether – A Rhode Island Medicaid Plan			<b>Fax Numbers:</b> RXUM: 617.673.0988

**Note:** This guideline does not apply to Medicare Members (includes dual eligible Members).

### OVERVIEW

#### **FOOD AND DRUG ADMINISTRATION-APPROVED INDICATIONS**

Xyrem (sodium oxybate) and Xywav (calcium, magnesium, potassium, and sodium oxybates) are central nervous system depressants indicated for cataplexy or excessive daytime sleepiness (EDS) in patients 7 years of age and older with narcolepsy. Xywav is also approved for the treatment of idiopathic hypersomnia in adults. Xyrem is administered twice nightly, while Xywav is administered once or twice nightly depending on the patient's indication, dose, and age.

Lumryz (sodium oxybate) is an extended-release oral suspension approved for the treatment of cataplexy or excessive daytime sleepiness in adults with narcolepsy. Lumryz is administered once nightly.

Xyrem has a high salt content. Patients who are sensitive to salt intake (for example, patients with heart failure, hypertension, or renal impairment) should consider the amount of daily sodium intake in each dose of Xyrem.

Lumryz, Xyrem and Xywav are contraindicated in patients being treated with sedative hypnotics or alcohol. They are also contraindicated in patients with succinic semialdehyde dehydrogenase deficiency.

### COVERAGE GUIDELINES

The plan may authorize coverage of Lumryz (sodium oxybate), Xyrem (sodium oxybate) or Xywav (calcium, magnesium, potassium, and sodium oxybates) for Members when **all** of the following criteria are met:

- Documentation the Member is not concurrently taking a central nervous system depressant, such as a narcotic analgesic (including tramadol), a benzodiazepine, a sedative hypnotic, or carisoprodol  
**AND**
- For a documented diagnosis of **narcolepsy with cataplexy:**

- Documentation the member has a diagnosis of narcolepsy with cataplexy  
**AND**
- The prescriber is a neurologist or sleep specialist, or a specialist consult is provided  
**AND**
- Lumryz:** Member has had an inadequate response or intolerance to Xyrem or Xywav  
**AND**
- Member has had an inadequate response or intolerance to two, or contraindication to all of the following: tricyclic antidepressant (TCA), atomoxetine, a selective serotonin receptor inhibitor (SSRI), venlafaxine.

**OR**

The Member is new to Tufts Health Plan and has been stable on sodium oxybate for at least 2 months prior to enrollment

**OR**

- For a document diagnosis of **excessive daytime sleepiness in narcolepsy:**
  - Documentation the member has a diagnosis of excessive daytime sleepiness due to narcolepsy  
**AND**
  - The prescriber is a neurologist or sleep specialist, or a specialist consult is provided  
**AND**

- **Lumryz:** Member has had an inadequate response or intolerance to Xyrem or Xywav
- AND**
- Inadequate response, adverse reaction, or contraindication to all three of the following: modafinil, armodafinil, and Sunosi (solriamfetol)

**OR**

The Member is new to Tufts Health Plan and has been stable on sodium oxybate for at least 2 months prior to enrollment

4. For a documented diagnosis of **idiopathic hypersomnia:**

- Request is for Xywav

**AND**

- Documentation that the member has a diagnosis of idiopathic hypersomnia

**AND**

- The prescriber is a neurologist or sleep specialist, or a specialist consult is provided

**AND**

- Inadequate response, adverse reaction, or contraindication to both of the following: modafinil and armodafinil

**OR**

The Member is new to Tufts Health Plan and has been stable on the requested medication for at least 2 months prior to enrollment.

**Reauthorization**

1. Documentation that the Member had an office visit and was reassessed for the condition within the past year, continued therapy continues to be considered medically necessary, and the Member is not concurrently using a central nervous system depressant.

**LIMITATIONS**

1. Initial length of approval will be for 6 months. Subsequent approvals will be for 12 months.

**CODES**

None

## **APPROVAL HISTORY**

October 11, 2022: Reviewed by Pharmacy & Therapeutics Committee.

Subsequent endorsement date(s) and changes made:

1. July 11, 2023: Effective August 1, 2023, added Lumryz to the MNG, requiring an inadequate response, intolerance, or contraindication to Xyrem or Xywav for its FDA-approved indications. Also updated title of MNG to include Lumryz. Effective October 1, 2023, updated criteria for idiopathic hypersomnia to require that the request is for Xywav.

## **BACKGROUND, PRODUCT AND DISCLAIMER INFORMATION**

Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. The plan makes coverage decisions on a case-by-case basis considering the individual member's health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

For self-insured plans, coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a Pharmacy Medical Necessity Guideline and a self-insured Member's benefit document, the provisions of the benefit document will govern.

Treating providers are solely responsible for the medical advice and treatment of members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
