

## Office-Administered Medical Drugs Available Through CVS Specialty

### *Tufts Health Public Plans Direct*

The following office-administered medications are available to providers through our designated specialty pharmacy provider, CVS Specialty, for shipment directly to the medical office as an alternative to traditional direct purchase. The member will pay their office visit copay (if applicable) when the medication is administered.

CVS Specialty provides a number of services to network providers, including medication delivery, 24/7 access to licensed pharmacists and nurses, and claims submission to Tufts Health Plan. CVS Specialty can provide medical benefit medications via mail service arrangements to medical offices as an optional service for providers who choose not to buy and bill.
